

# **CONIMED SA**

**CONIMED S.A.** of Buenos Aires, Argentina designs and manufactures electrical testing equipment to be used at the laboratory or in the field. Typical applications are calibration of instrument transformers, diagnostic of motor and generator insulation, partial discharges detection, dissipation factor and capacitance measurements.

The Company, founded in 1976, has a Calibration Laboratory with traceability to national standards and under the scope of ISO 17025.

**CONIMED** has moved recently to a new industrial building, with 400 m<sup>2</sup> for the production of test equipment with the most advanced technology.

The Company is managed by experienced engineers with years of experience in this area, and has a partnership with the National Institute of Technology (INTI) for the developing of test instruments and calibration technology.
