

CONIMED

**Model DI – 4
Inductive Voltage Divider**

Features and Specifications:

Model DI-4 is a two stages high accuracy inductive voltage divider that accepts input voltage up to 600 V @ 60 Hz. Double screen is included between primary and secondary windings. A 50 Hz version is also available.

The following voltage ratios are easily selectable:

60 - 120 - 240 - 600 V / 6 V

Local and Remote (USB) ratio selection is included.

Ratio error: ± 3 ppm

Phase error: ± 5 μ radian

Max. load: 1 M Ω - 1 000 pF

Calibration frequency: 60 Hz

Rear Panel of DI-4:
